

Empathy Map

Date	15 March 2024
Team ID	SWTID-2026-7879
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS	THINKS
"I need better control over record access."	"Users should only see records they are permitted to access."
"Different records have different sensitivity levels."	"Role-based access alone may not be sufficient."
"The access rule should be automatic."	"The ACL should evaluate the record dynamically."

DOES	FEELS
Creates users and roles	Concerned about data security
Configures ACLs	Responsible for protecting records
Tests user permissions	Wants predictable access behavior
Maintains ServiceNow applications	Confident when access is properly controlled
