

Problem - Solution Fit

Date	15 September 2026
Team ID	SWTID-2026-7879
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

Area	Project Content
1. Customer Segment	ServiceNow administrators, developers and organizations using ServiceNow
2. Problems / Pains	Difficulty restricting individual records using only standard role-based permissions
3. Triggers to Act	Sensitive or confidential records require additional access restrictions
4. Emotions Before / After	Before: Concern about unauthorized access. After: Greater confidence in record security
5. Available Solutions	Roles, ACLs and conditions
6. Customer Limitations	Complex access requirements may require scripting
7. Behavior	Administrators configure roles and ACLs and test access
8. Channels	ServiceNow platform, ServiceNow Studio and administration interface
9. Root Cause	Access requirements can depend on individual record field values
10. Your Solution	Script-Controlled ACL that dynamically checks field values and grants or denies access
