

Scalability & Future Plan

Date	15 September 2026
Team ID	SWTID-2026-7879
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority
1	Basic field-based conditions	Complex policies may need additional scripts	Medium
2	Manual ACL configuration	Large applications may require more administration	Medium
3	Limited reporting	Access decisions are not centrally visualized	Low

Scalability Plan:

S.No	Aspect	Current State	Proposed Upgrade
1	User Load	Supports normal ServiceNow users	Optimize ACL scripts
2	Data Storage	ServiceNow database	Use ServiceNow platform scaling
3	Performance	Simple scripted condition	Optimize complex conditions
4	Security	Field and role validation	Add advanced access policies

Future Roadmap:

Phase	Planned Enhancement	Expected Impact
Phase 2	Multiple field-based access rules	More flexible security
Phase 3	Advanced role and group validation	Better access management
Phase 4	Access audit and reporting	Improved monitoring
